

I don't suppose you are interested in protection my business from other competition, are you? Why not leave XM alone. I can get instant traffic and weather instantly with XM. The local broadcast is either not in range or I have to wait until they decide to give it to me. When in a strange city I have no idea where to tune in to get local traffic and weather. Broadcast radio can do the same as XM if they wish, but it just isn't profitable. I switch to the XM weather and traffic when I want to, then I either listen to XM or FM, MY CHOICE. I pay a monthly fee for the privilege of what I want to hear, not what broadcast wants me to hear. What if they are hurt by XM, they are the new kid on the block. If XM is so great why not copy what they are doing instead of whining about the competition. Many, Many businesses come and go because of competition.
